

知识库检索系统UML图集

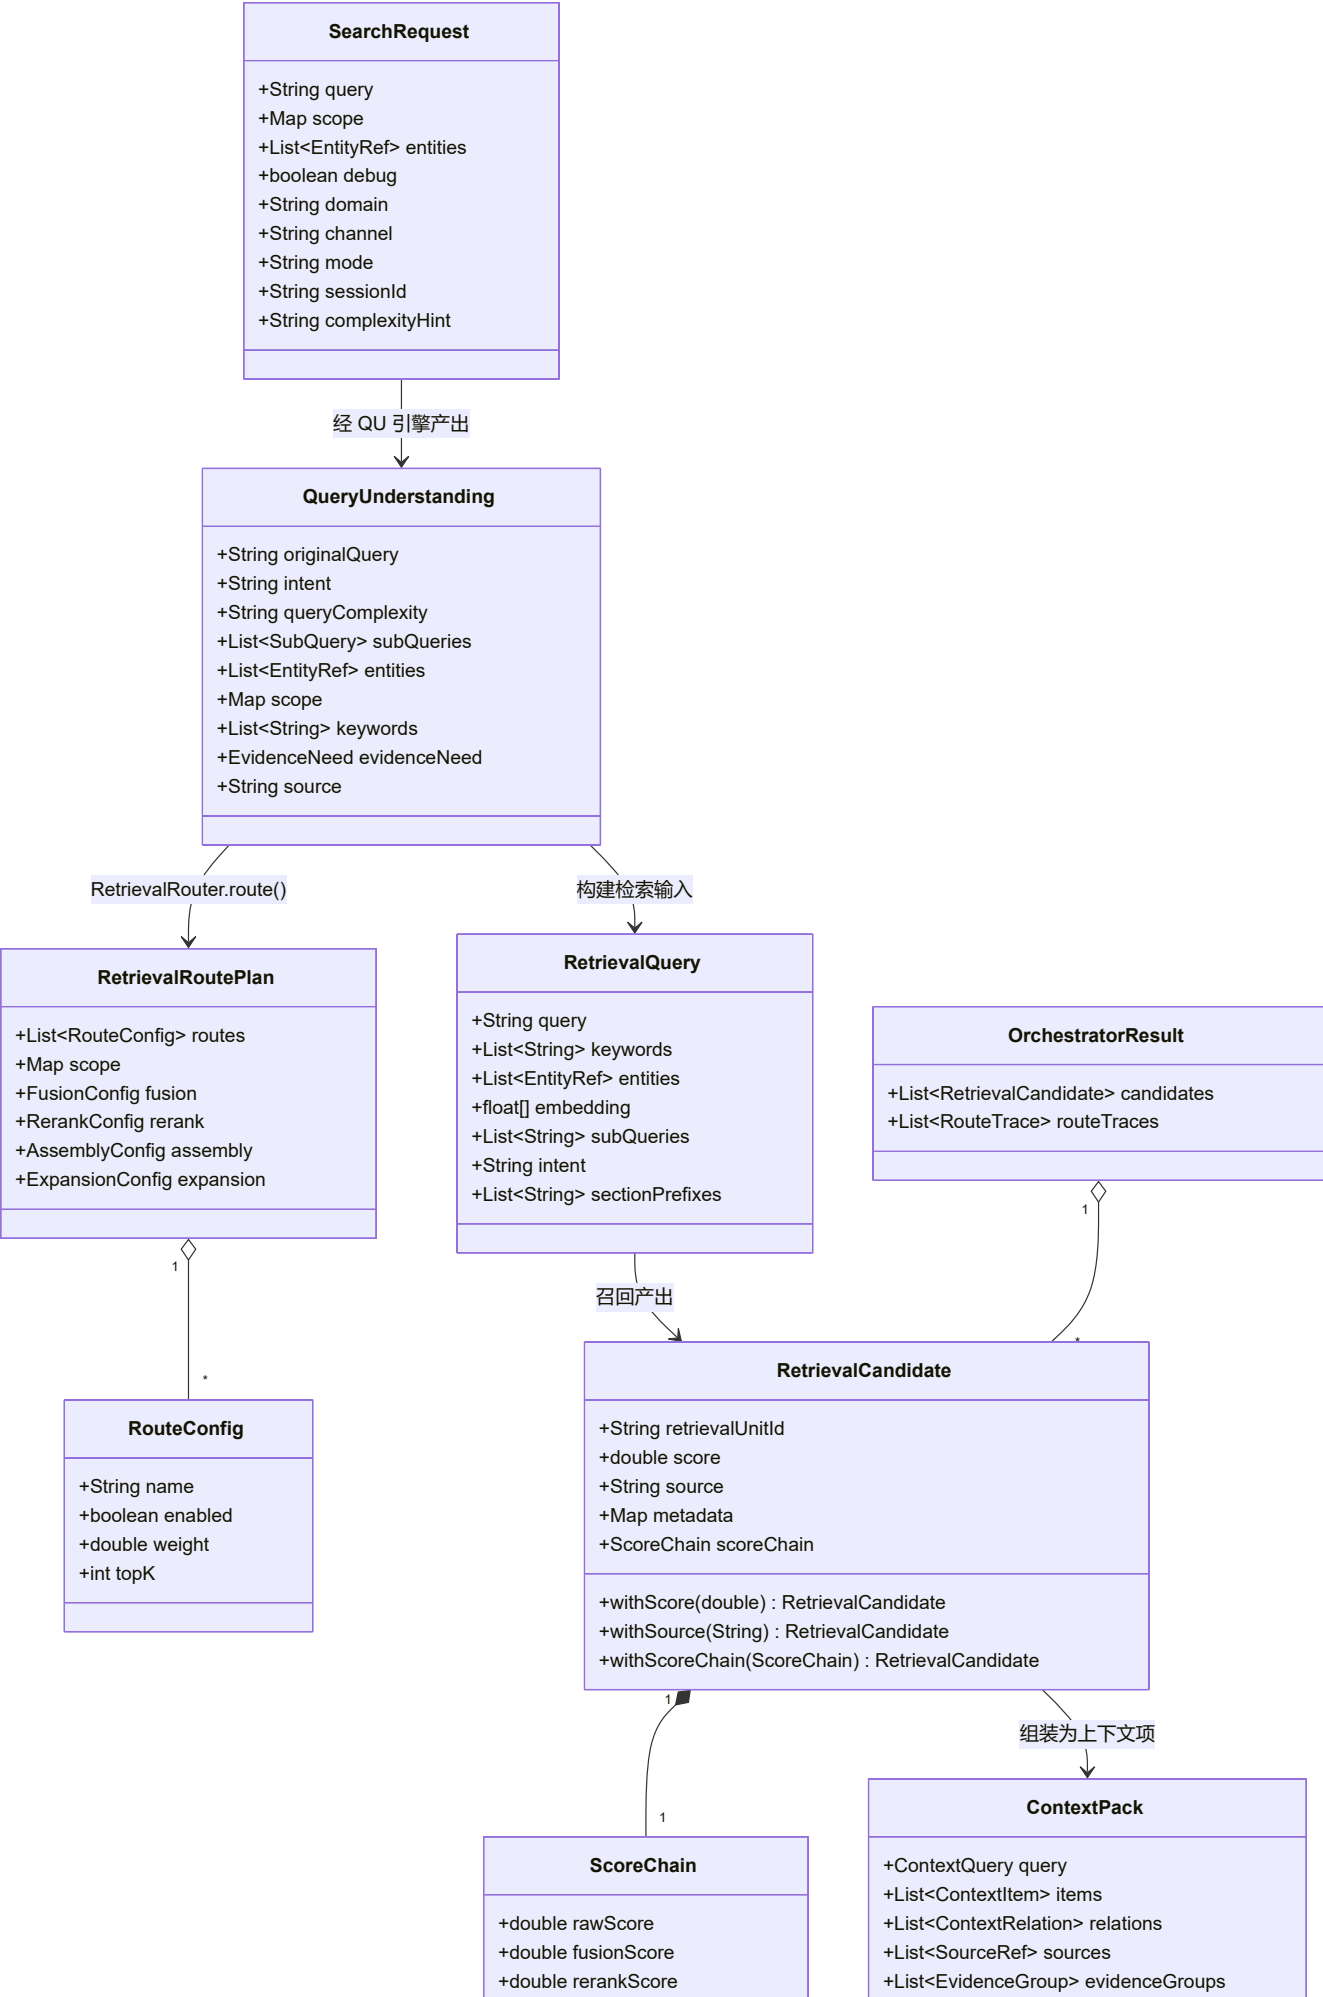

1. 组件 / 分层依赖图 (Component Diagram)

DDD 单向向内依赖；外部系统以虚线标注。

2. 领域模型类图 (Domain Class Diagram)

核心不可变 `record` (`with*` 派生)。

+List<String> routeSources

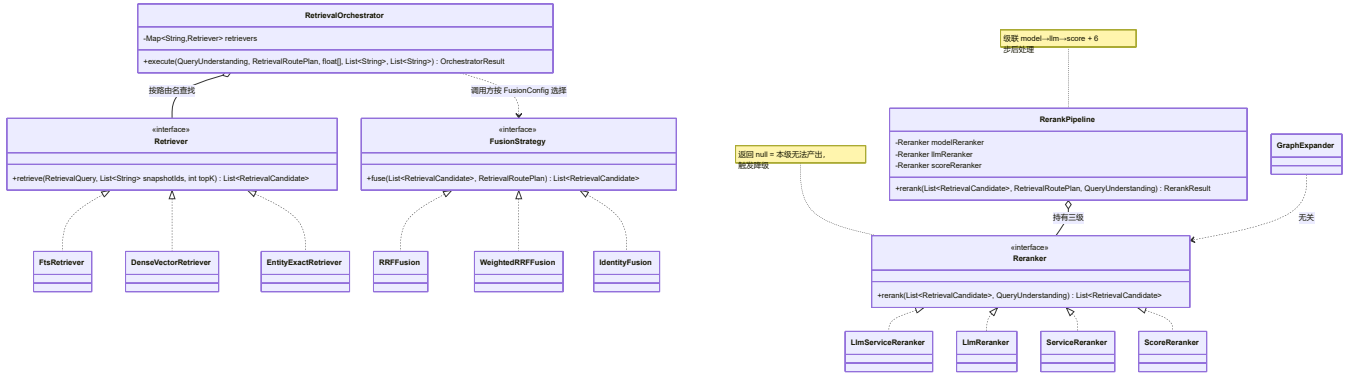

+List<Issue> issues

+List<String> suggestions

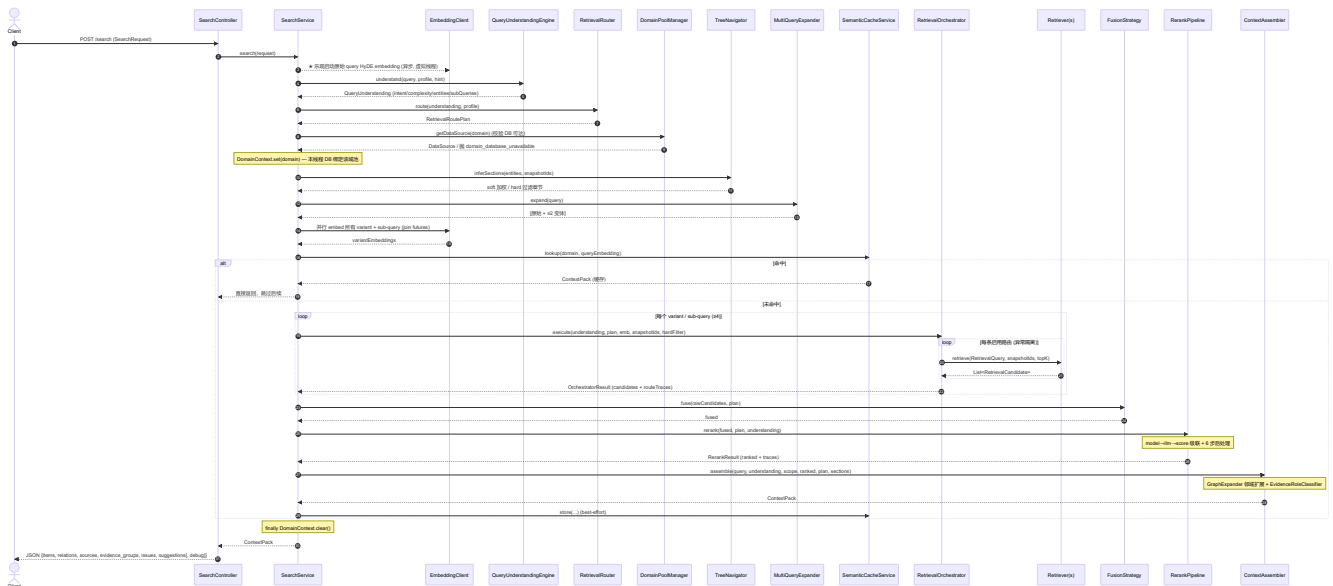

+Map debug

3. 策略模式类图 (Strategy Pattern)

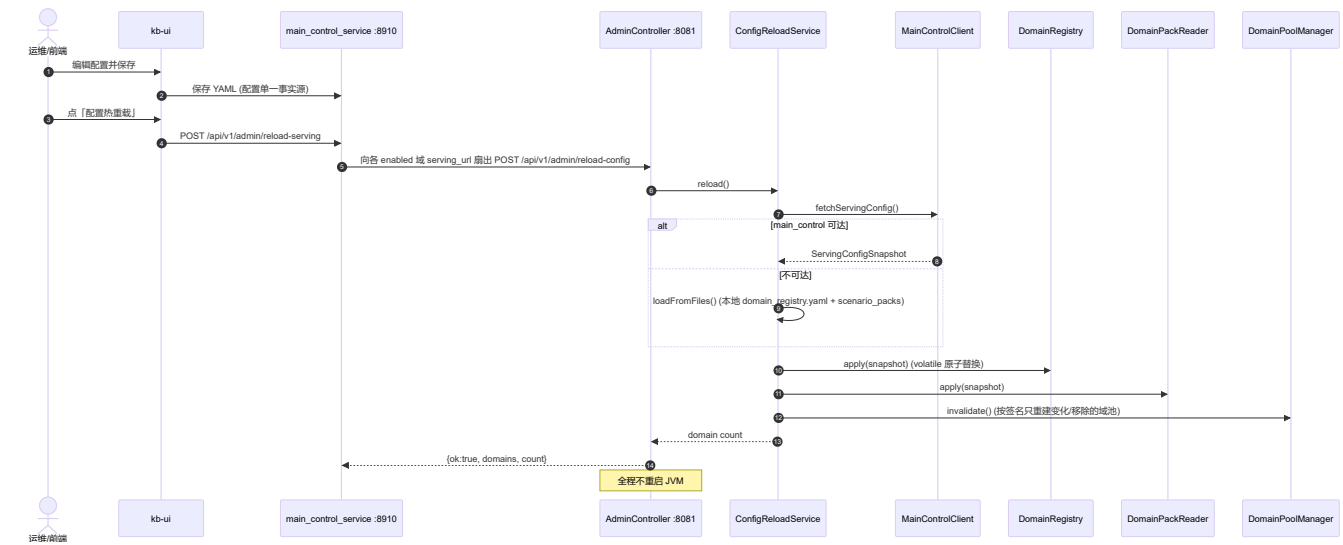

三处可插拔点：召回 / 融合 / 重排。

4. 检索主链路时序图 (POST /api/v1/search)

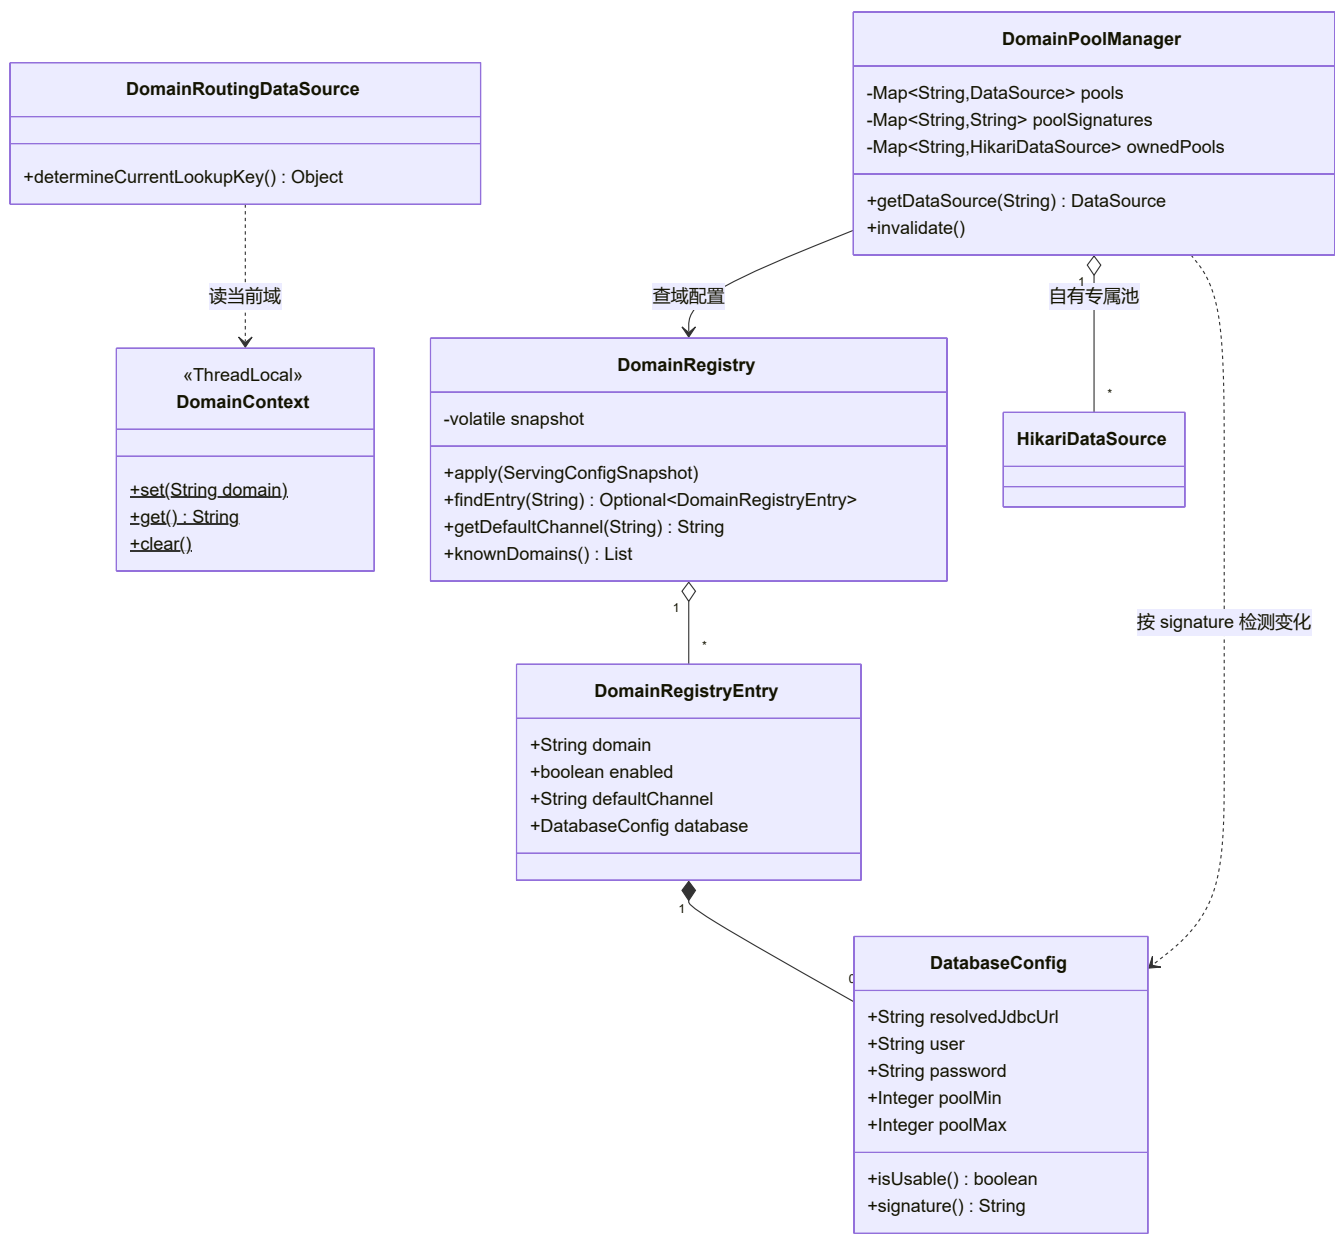

5. 配置热重载时序图

启动期 @PostConstruct 同样调 reload()；失败则降级为空配置 (lenient)，靠 reload 端点恢复。

6. 多域路由与连接池类图

7. 部署图 (Deployment)
